

# Standards Met. Confidence Secured.

## Business Objective

A leading bank in Bangladesh required independent third-party validation that its data centre implementation met TIA-942 Rated 3 standards ensuring the financial institution's critical infrastructure could deliver the reliability and availability demanded by banking operations and regulators.

## BUSINESS NEED

**Validate TIA-942 Rated 3 Compliance for a Live Banking DC**

- Conduct a full physical audit and design review to confirm the facility met Rated 3 requirements for a regulated financial environment.

**Identify & Resolve All Non-Compliances**

- Surface infrastructure gaps across design and implementation, and deliver a prioritised corrective action plan.

**Establish 3-Year Certified Reliability Assurance**

- Secure certification with ongoing surveillance to give regulators and stakeholders confidence in infrastructure reliability.

## SOLUTION & IMPACT

**TIA-942 Rated 3 Certification Achieved**

- Internationally recognised validation of banking infrastructure reliability delivered for the Bangladeshi bank.

**All Non-Compliances Identified and Corrected**

- Every Rated 3 gap surfaced and addressed, eliminating compliance risks before they could impact banking or audit outcomes.

**3-Year Certified Compliance Established**

- Surveillance programme locked in, providing ongoing assurance to leadership, regulators and customers.

## Conclusion

Technavious delivered TIA-942 Rated 3 facility certification for one of Bangladesh's leading banks, combining rigorous physical audit with practical corrective action to close every compliance gap. The result: internationally certified infrastructure, regulatory confidence, and 3-year assured reliability, protecting critical banking operations and institutional reputation.
