

Rated-3 Certified for Insurance-Critical Systems

Business Objective

A leading Indian life insurance organisation required its data centre evaluated against TIA-942 Rated 3 standards, ensuring the infrastructure protecting critical policyholder data and financial systems met international reliability and availability benchmarks.

BUSINESS NEED

Validate As-Built Implementation Against Rated 3 Standards

- Review as-built drawings and conduct a physical audit to identify all gaps between current implementation and TIA-942 Rated 3 requirements.

Deliver a Prioritised Corrective Action Plan

- Provide actionable remediation recommendations that enable the organisation to close compliance gaps systematically.

Establish Certified Infrastructure Assurance

- Secure a compliance pathway giving leadership confidence that critical insurance data infrastructure meets international standards.

SOLUTION & IMPACT

Complete As-Built Gap Report Delivered

- Every Rated 3 gap identified, including many never formally documented, giving the organisation a full compliance baseline.

Ready-to-Execute Corrective Plan Delivered

- All gaps surfaced with specific recommendations, operations team equipped to achieve certification without further third-party assessment.

3-Year Certification Pathway Established

- Compliance roadmap and surveillance programme gave leadership assurance that critical policyholder data infrastructure meets international standards.

Conclusion

Technavious provided one of India's leading life insurance organisations with the rigorous compliance assessment needed to protect its most critical infrastructure. By reviewing as-built documentation and conducting a thorough physical audit, every Rated 3 gap was identified and a clear corrective roadmap delivered safeguarding policyholder data and regulatory standing for years ahead.
