

Technical Due Diligence – Data Centres

EMPLOYMENT TYPE Full-Time	EXPERIENCE REQUIRED 2 to 3 years
LOCATION Mumbai / Navi Mumbai	DEPARTMENT Technical Due Diligence

About Technavious

Technavious Solutions Private Limited is a data centre consulting, engineering, commissioning and certification firm, with a presence across India, Dubai, the United Kingdom and the United States. It is the only ANSI or TIA-942 Certification Body headquartered in India, and it takes a brick to chip approach that covers the full data centre lifecycle, from early feasibility and design through to construction, testing and commissioning, and long-term certification. Over seventy clients across fifteen countries have trusted Technavious with some of their most significant data centre builds.

Role Overview

Technavious is hiring Civil Engineers for Technical Due Diligence to join its growing team on greenfield data centre projects, based in Mumbai and Navi Mumbai. The person in this role will carry out technical site due diligence and feasibility assessments so that clients understand the risks, constraints and opportunities of a site before they commit to development. The work is hands-on and involves site assessments and multidisciplinary coordination, and it suits an engineer who is passionate about civil engineering and keen to build a career in data centre infrastructure.

Key Responsibilities

- Conduct Technical Site Due Diligence (TSDD) for greenfield data centre projects.
- Perform site feasibility studies and technical assessments.
- Assess civil, structural, geotechnical and infrastructure related aspects of the site.
- Identify site risks, constraints and development opportunities.
- Prepare technical reports covering the findings of each assessment.
- Coordinate with multidisciplinary teams to complete assessments and align findings.

Required Qualifications and Experience

- B.E. or B.Tech in Civil Engineering.
- Two to three years of relevant, hands-on experience in Technical Due Diligence (TDD), site assessments and technical consulting.
- Working knowledge of civil, structural, geotechnical and site infrastructure assessment.

- Clear technical report writing, and the ability to coordinate with multidisciplinary teams.

Preferred, Good to Have

- Experience in the data centre industry, particularly on greenfield projects.

What We Offer

Technavious offers a role at the centre of India's data centre build out, with direct exposure to hyperscale, colocation, enterprise and BFSI clients across several geographies. The firm's culture is built around collaborative excellence, an open and innovation first mindset, and a genuine commitment to work life balance and sustainability, including its own net zero ambitions. People who join Technavious work alongside senior engineering and delivery leadership on projects that shape how mission critical infrastructure is planned, built and certified in India and beyond.

How to Apply

Interested candidates can share their updated CV by email at HR@technavious.com or through a direct message on LinkedIn. Know someone who would be a great fit? Please share this opportunity within your network.
